

Cross-page resources

This controlled document preserves a table across two source pages.
The first table part contains rows A through E; the next page continues it.

Figure 1. Two original colored series; the pixels must remain unchanged.

Table 1. Samples and latency, with a continuation on page two.

Row	Samples	Latency (ms)	Status
A	64	1.25	complete
B	128	2.50	complete
C	192	3.75	complete
D	256	5.00	complete
E	320	6.25	complete

All measurements use the same device¹.

¹ Values are synthetic; they test extraction, not scientific claims.

Cross-page resources (continued)

Table 1 (continued). The same columns continue with rows F through J.

Row	Samples	Latency (ms)	Status
F	384	7.50	complete
G	448	8.75	complete
H	512	10.00	complete
I	576	11.25	complete
J	640	12.50	complete

The continuation ends at row J. No rows are omitted.

The complete table contains ten rows and preserves all sample counts.
